Win Alarm Clocks

Reboot yourself

Have you ever felt that life could just be so much more fun if the mundane was turned into something extraordinary? If our every-day routines could be spiced up with something funky? Do you feel like it's out there but you have no means to get to it? You're not the only one!

Born out of the basic desire for music in the shower and the realization that we in India do not have access to quirky yet high utility products for run-of-the-mill needs, came **HitPlay**.

With a focus on hip gizmos and premium gifts, **HitPlay** brings you products to liven up your every-

day. Amongst others, find unique, funky lava lamps, alarm clocks that run away, playing your favourite music, light up t-shirts and of course a shower radio. Boring is now a thing of the past!

HitPlay also gives you the convenience of acquiring all these products from the comfort of your home, by clicking on their online store – www.hitplay.in.

They have also tied up with offline stores – Crossword Bookstores, Rhythm House, Tappu Ki Dukkan, Reliance Time Out, Landmark, etc. for on ground retail of their products.

Clocky: The alarm clock that runs and hides to get you out of bed.

This little wonderful wheeled alarm clock started as an engineering student's project. Having trou-

ble waking up, Gauri Nanda developed Clocky, which shrieks annoyingly. Clocky allows you to snooze once. After which, like R2D2 on Red Bull, it leaps off your nightstand and wheels around your room looking for a place to hide. As it screams and flashes, you will have to run around your room to turn this thing off.

Kind of like a misbehaving pet, only he will get up at the right time and give you a quick workout to start your day.

To win, send an SMS to 57575 with the message "TOMSO (your name)" or email your name and contact details to offers@timeoutmumbai.net with "CLOCKY" in the subject line.

We use cold-pressed oils like almond, coconut, jojoba etc. We persevere to ensure that the formulations incorporate the latest advances while being as natural as possible. Some innovations from our R&D lab that have been incorporated into our products include using emulsifiers from natural sources only (sal tree gum, beeswax), natural thickening and gelling agents (acacia gum, xanthan gum, cellulose).
